This week's highlighted area is... Game Station!

We started to explore group board games with children last semester and they played quite a few of them in small groups with the assistance of a teacher and on their own. We want to move towards having an area of the classroom where they can make their own games. We are starting with an area that has different game materials like dice, spinners, buttons, and timers, and more. We want to give the children an opportunity to play with the materials and think about how they could be used before they begin to create their own game boards and pieces.
